

**NATURE'S LAWN
& GARDEN INC.**

Nature's Biological Dethatcher™

Treats 10-11,000 sf. per quart

Contains A Proprietary Microbial Blend of Carbonic Enzymes and Bacterial Species Designed to Help Decompose Thatch.

APPLICATION INSTRUCTIONS:

FOR EXISTING THATCH LAYER: Apply at 3 oz. per 1,000 sf. every 3 weeks. Water it in with enough water to soak all the way through the hatch layer and into the soil. Add AERIFY or AERIFY PLUS to help aid penetration through the hatch. Apply mid-spring through early fall.

WATER REGULARLY: Keep soil and thatch layer moist or decomposition will cease. The thatch degrades at the point where it comes into contact with the soil. You will see it turn into a rich, dark humus as it begins to break down.

STORAGE: Keep container sealed when not in use. Do not expose to sunlight for long periods of time.
Store in temperatures between 41 F (5 C) and 77 F (25 C).

WARNING: Harmful if swallowed. Avoid contact with eyes, skin and clothing. If on skin, wash with large amounts of soap and water. If in eyes, rinse repeatedly with clean water. SAFETY GLASSES ARE RECOMMENDED.

NET SIZE/WEIGHT:

1 QUART
2.58 lbs.

1 GALLON
10.31 lbs.

2.5 GALLON
25.8 lbs.
